Continuation of Substance of Interview including description of the general nature of what was discussed: Indicated to Donna Becker that the reagent components recited in the instant application should be consonant in content and scope with those recited in the method claims of the parent application so as to provide a system that indicates proliferative status of primitive hematopoietic cells in a sample. Donna indicated her intent to file a Supplemental Amdt. which reflects changes that need to be further effected into the claim, as well as addition back of the withdrawn species into the allowed set of claims. .
